News of Mine, of Prospect, of Furnace and of Mill.

MAY DIVIDENDS CONTINUE TO FLOW

Grand Central of Tintic and Utah of Fish Springs Appear in Their

HE Grand Central of Tintic will distribute the regular dividend in the usual sum of \$25,000 on Saturday, the transfer books to close today, said Manager Lock, who was up from the bonanza again yesterday, accompanied by another big consignment of ore, of which the management forwarded over seventy carloads in April. While the members of the official household are not exploiting it, it is said that the treasury of the company reveals a larger surplus at present than

reveals a larger surplus at present than at any period in several years while the condition underground exceeds any since the search for wealth was inaugurated there by the big fellows.

The directors of the Utah of Fish Springs in the Deep Creek country, yesterday posted its dividend of a cent a share, or \$1000, for distribution May 25, while on the road from the mine is a consignment of ore, the proceeds of which alone will privide the means with which to make it. Reports from the property indicate a most satisfactory condition among the ore bodies, while condition among the ore bodies, while the output of the present season prom-ises a record equal to that of any previous year in the career of the prop

MANAGER JOSEPH ON CARISA STRIKES

HE new strikes at the Carlsa of Thatic are all that has been depleted, said Manager Joseph, who came in from camp yesterday morning and departed again last night. The disclosure, which is fifty feet below the 100-foot level instead of on that level proper, shows no less than five feet of ore with the second-class maintaining an average of 12 per cent in the red metal, while some of the rock compares with the best over hoisted from the hill. On the level below, Manfrom the fill. On the level below, alth-ager Joseph says thirty inches of ore exposed when he left will average 25 per cent copper and that it has the ap-pearance of widening out. All the rock contains as much as \$2.80 gold, with an average of about seven ounces sil-ver to the 100. ver to the ton.

It is understood that the company has a balance in the treasury at this time and that apprehensions concerning an assessment are entirely without foundation. The management has decided on very active extraction while it looks at this time as if an ore body was to be encountered on the 700-foot level in a short time.

TO SINK DEEPER IN WAX DEPOSITS

T. P. Rigney, manager of the ozocer ite or mineral wax mines and reduction works at Soldier Summit, left for his camp again last night, to resume sinking and to establish another level at a depth of 275 feet, or 100 feet below the present workings. While the under-taking is one which requires the most economical handling, said Manager Rigney, he has thus far maintained a balance to its credit, and sees, course, bigger earnings ahead of him. He has been forwarding the output to the markets of New York and Germany, where it is sold on a good mar-gin. Samples of the wax exhibited by him yesterday reveal a very high per-centage, while the product of the mill beats out its rivals, notwithstanding the long haul to market.

NEW YORK ORES NOW AT THE SAMPLER

The New York Bonanza of Park City is at the sampler with two more car-loads of ore which has been taken out in the prosecution of development, and while Manager Wilson declined to anticipate the controls, he has no doubt, guided by camp assays, of a fair mar-gin. Meanwhile the work south is making good progress, and an important change is expected at any shot. The situation is an acute one under ground.

Tonopah Stock Sales.

Monday's transfers on the San Fran-isco board were recorded as they fol-ow: Tonopah, 1050 at \$1.60@1.62%; Ray & O'Brien, 2500 at 5c; Belmont, 1907 at 70%71c; 1500 at 70c, seller thirty days; Midway, 1700 at 39c; 300 at 40c, buyer

For sickly girls and women who suffer from Monthly Irregularities, Backache, Cramps, Sick Headache, Sleeplessness Indigestion, Dyspepsia or Constipated Bowels there is no medicine will give relief so quickly as the Bitters. The weakest stomach can retain it. Therefore we urge a trial at once.

five days; MacNamara, 3200 at 18c; Rescue, 300 at 6c; Tonopah Extension, 1100 at \$1.19@1.12½; Tonopah Mining company, 100 at \$9.12½.

BUT FEW DOLLARS DID THE BUSINESS

The day on the mining exchange close with the sale of 18,905 shares of stock for \$3,447.50, and with the market again easily gratified. Daly West appeared to have resigned itself to a position around \$22.50 which investment on a 40-cent dividence carning better than 21 per cent, while Grand Central remained an offering at \$4.90, on which figures it is paying the shareholder over 24 per cent. Montana o Tonopah, which continues to add to its surplus, sprinted up to \$1.63, while New York, which is at the sampler with an other consignment of ore, brought H other consignment of ore, brought il-cents, with Tetro receding a fraction or two. Carlsa was partaken of cautiously notwithstanding the new disclosures, while Yankee Con. changed hands at 355 and Sacramento at 155, Con. Mercur was weak around 23 cents and Star Con, around 14, the day closing on the follow-ing market.

GOLD DREDGING ON THE PACIFIC'S SHORES

After a pleasant and instructive sojourn in Zion as the guest of Hon. D. H. Perry, William O'Connor left for his home in San Francisco yesterday, promising to repeat the visit when opportunity affords. While the marvelous ledges with which California is endowed, contain their production of gold in large volume, said Mr. O'Connor, the feature of the industry in that commonwealth at this time is that in which the dredge is being employed and with which the operation of the places has been revolutionized. In Guba district, where two dredges are now being in-stalled by Robert D. Evans of the United States mining company and his associates, about thirty of these ma-chines are now in commission, while others are projected. The result can-not but add largely to the gold output of California, said Mr. O'connor, and the years production should show a most pronounced increase. Mr. O'Con-nor made a number of following with nor made a number of friends while here who will be glad to undertake his entertainment in the future.

TO BREAK GROUND ON NEWHOUSE MILL

TTH supplies on the ground and a new roof beneath which to shelter his forces Joseph Dederichs, superintendent of construction, departed for Newhouse last night to inaugurate work on the big concentrator with which the Newhouse mines are to be equipped. The beginning will be upon the foundation and as the nature of the earth at that point makes it necessary to confine the excavation to "hand work," ninety days will be required to prepare it for the massive structure for which material, meanwhile, will have begun to arrive, and which will be knitted into place as rapidly as an army of skilled workmen can dispatch it. Along with work on the foundation the huge ore bins at the mill will be constructed, with another at the mines. In the next ten days the camp will present one of the busiess

camp will present one of the busiest spectacles in the State.

That the contract for grading on the Newhouse terminal out of Frisco has been awarded by the San Pedro officials at Los Angeles, is information that is hourly expected.

U. S. R. & R. COMPANY STARTS CYANIDE PLANT

The new \$15,000 cyanide plant just completed in Colorado City by the United States Reduction and Refining company was started up Tuesday for the first time, writes the correspondent of the Denver Republican. As soon as the tanks are leached the concentrator attached to the old Colorado-Philadelphia mill will be put in operation. The two plants will treat the vast dumps lying around the Standard and Philadelphia mills, all of which, it is expected, can be handled at a profit. After the dumps are exhausted the cyanide plant will be used to treat Crip

ple Creek ore.

The personnel of the big company which is doing so much for Colorado embraces all those who are exploit-ing the Utah Copper company of

GOLDFIELD'S TALENT RECORDS NEW STRIKES

In its digest of the week, the News of Goldfield, Nev., says: dump waiting for the freighters. As is well known, the sacked ore averages nearly \$200 per ton. Sinking on the main shaft has been resumed, and it is now down 149 feet. Some of the best pancame from the bottom of the shaft Wednesday. The lessees are also sing-ing on the second shaft and it is down

190 feet.

The Oddie and Gardner lease on the Sandstorm is making a showing that in dicates it will make & big proposition when a mill to treat low-grade ores has been erected. A ledge twenty-five feet wide has been proved for a distance of 300 feet and the whole mass will go from \$10 to \$15 in free milling gold ore. A streak along the handing wall, where the shaft is being sunk, showed shipping values, the assays going from \$10

to \$500 per ton. Strange, Witherspoon and Obert have started sinking a shaft on some claims on the south side of Magruder mountain, near Lida, where they have an en-

couraging showing. Jake Martin, leasing on the Saint Ives, broke into ore this week, which, if it holds out, will entitle him to get into the band wagon of the shippers. In sinking the shaft, rock carrying fair milling values was soon encountered, but at a depth of twelve feet, ore was found which pannings indicate would go up into the hundreds of dollars per

UTAH MINERALS AND PLACES OF OCCURRENCE

The third edition of "Utah Minerals" compiled by Maynard Bixby, with a descriptive list and notes for collectors, his made its appearance, the edi-tion the largest which has come from the press, and to be circulated exten-sively at the World's fair in St. Louis. The publication cannot but appeal to every one interested in the metals, min erals and rare elements, while no stu-dent's library is complete in its ab-

Sold by leading druggists. Send to in stamps for sample to The Herpicide Co., Detroit, Mich.

IN GARNET GROUP

Samples of Ore Revealing Most Sensational Values in the White Metal.

AMPLES of ore with which George Robertson came in from Tintic yesterday morning afford evidence of one of the most sensational strikes ever made in the properties of that district, the beneficiaries none other than the lessees of the Garnet group adjoining the Sunbeam, and consisting of Mr. Robertson and his assoclates. It was in the face of a drift about eighty feet distant from the tun-nel on the property that the ore was broken into, said the visitor, who has been serving the Tintic Mining & Development company as superintenden of its Tintic system of mines, and while assays had not been obtained last night, there is no doubt of the presence of a thousand ounces or more of silver

er ton. Mr. Robertson reports sixteen inches of this class of ore in the figure in the porphyry and with stoping ground enough to afford most profitable picking in the event it continues to the surface. The Garnet is among the oldest locations in that portion of Tintic as is owned by a company, although it has been idle since the boom in that locality.

NEW FURNACES

AT MURRAY PLANT

Reservations having been made for two additional furnaces when the original battery of eight was being installed by the American Smelting & Refining ompany at its Murray plant, the enlargements have been greatly simplified and the new blasts will be completely before the season is much further advanced without difficulty. Meanwhile the plant with its present equipment is making a record that sets the pace, per-

haps for any in the system. President E. L. White of the Bingham smeller, who was the guest of Manager Whiteley of the American during the day, confessed his astonishment last night at the ease with which the great clume of ore arriving daily at its bins s reduced, and the fine quality of bul-ion that is daily added to the world of ealth. To accomplish this, however vast amount of money has been expended on equipment for every device that can possibly add to its economic features has been employed. With his bservations President White was very much pleased.

WEST DIP TUNNEL IN THE FAR EAST

The Investor, Boston, replying to a uery from Pawtucket, R. L. concern ng the Bingham West Dip Tunnel com-pany, says: This company is capital-ged for 10,000,000 share of the par value of one cent per share. There are over 100,000 shares of stock in the treasury, with no debts.

The company owns about 520 acres of unpatented ground. Its development work consists of a tunnel 300 feet long and a good wagon road from the rail-road to the mouth of the tunnel.

Goldfield, Nev., says:

On the Kendall & Co. lease on the January they are not doing a thing but taking out lots of ore every day and blocking out new bodies which will add greatly to the tonnage. About 800 sacks have been shipped the last two or three have been shipped the last two or three company was stated own ground and running a long tunnel tapping the velns underneath the surface of all of the large properties of Bingham. It estimates that it may have to run 20,000 feet, while he will tap the veins from one to 2000 feet vertically under the The company was started with the in-tention of developing its own ground lowest workings in the camp.

The tunnel starts on the west side of the Bingham range in Pole canyon. It is five feet wide by six feet eight inches high in the clear, i. e., inside of timbers, with a flume for drainage purposes two by three feet underneath the tunnel.
In addition to mining its own ground

t hones to drain ground through which it runs, and furnish a cheap outlet for the ores in the ground belonging to the large companies of Bingham, and to ceive a royalty for the use of its tun-

It expects to strike ore in its own ground at about 700 feet from the pres-ent face of the tunnel.

A CHANGE IN PROGRESS AT THE LITTLE CHIEF

A report from Superintendent Hannifen of the Little Chief of Tintic to President Moritz tells of a most intersting change now taking place in the north drift and while the ore has not come in yet it is expected on any shift. The rock is heavily mineralized with spar and manganese that always ante-dates ore in the region quite pro-

BETTER GOLD ROCK AT THE CON. MERCUR

Reports from the Con. Mercur during the past few days denote not only an improvement in the quality of ore now going into the big mill but a saving. Indeed, it is said of the that its contents are fully up to those from which dividends were formerly derived, while the ore bodies appear stronger than at any period in a long

KIMBERLY-RYAN INTERESTS, BEAR GULCH, MONTANA

The affairs of the Kimberly-Montana The affairs of the Kimberiy-kindana company, operating in Bear guich, Park county, Mont, are in bad shape, says a special correspondent of the Mining World, Chicago. Until now there have been two factions—the Chicago stockholders and the Canadian. For several months J. Mackin of Chicago has held options on the stock of the Chicago parties and it is reported that he has taken up the bonds. Being an associate of Henry M. Ryan, together with the fact that the block of stock is a large one, this transaction gives the control of the property to the Ryan side. Matters have been coming to a crisis in these properties for some time. The mines are now closed down pending an investigation by Mr. Ryan who is of the coinion by Mr. Ryan, who is of the opin-on that there is something wrong with he mill, as the assay values of the ore. which has been running through the mill for the past several weeks, is high-r than that of the ore run through dur-ng the months when the company was making good money. In spite of this fact it is claimed that the company has

Importers and Roasters of Fine Old Coffees

ot been making any money lately. It is thought by some that the plates have been greased to make the gold slip off with the refuse into the creeks. A number of claims against the company are being paid off. There is a movement on foot now by which the owners of the Crevasse property, not far from the Kimberly properties, hope to secure the Rimberly properties, hope to secure the management of the latter. The Crevasse contains a large quantity of ore, but has no mill to treat it. The Kimberly people have the mill and not a very large ore body to draw from. It is thought that these two properties will eventually be combined. eventually be combined.

DLDEN GATE

WICHA JAVA

THE DAY'S WEALTH OF ORES AND BULLION

In the ore and bullion market the day's settlements climbed to \$95,000, McCornick & Co. reporting them as they follow: American buillon, \$47,800; gold buillon, \$10,600; gold, silver, lead and copper ores, \$37,600.

In the metal market silver ruled at 55% cents an ounce, lead at \$3.50 per 100 pounds, and casting copper at 12% cents a pound.

ents a pound.

Boston Wants Copper Stocks.

Special to The Tribune.

BOSTON, Mass., May 11.—The demand for copper stacks this morning was somewhat surprising, considering the weak closing of last night. Early prices were firm and an improved tendency was in evidence. Local houses were sellers of Amalgamated, which was readily taken by New York, while other stocks were in good demand, although gains were mostly fractional. The feeling at the close to night is as good as it was bad last night. Hornblower & Weeks, brokers, 53 State street, Boston, and 10 Wall street, New York, furnish the following quotations:

Sales, High. Low. Close. Amalg'd. 4,284 \$48.75 \$47.624 \$48.75 \$1.874. Daily West. 125 25.60 Mercur. 669 32 Utah. 225 33.50 Utah. 225 33.50 Utah. 225 33.50 Curb-Boston, \$8.6066.124. pecial to The Tribune

Mining Notes.

Maj. W. A. Stanton, manager of the Queen of the Hills, out of Halley, Ida., leaves for camp next week to inaugurate the season's development.

Prof. Geo. W. Maynard left for Pioche, Nev., last night to conduct an examina-tion of mines in that old camp, with the structural features of which he is so fa-

Another lot of ore from the Continental-Alta was being piled up at the sampler resterday. It was said yesterday that the consoling dation of the Sait Lake and Jim Butler mines at Tonopah, Nev., is now positively assured.

assured. Manager Farnsworth of the Bullion-Beck left for that Tintic property yester-day morning to inquire into the result of development in new ground.

A bar of gold buillon from the Dexter of Tuscarors, Nev. was among yester-day's receipts from that State. Accompanying it is a small lot of very high grade gold ore sent in by the lessees on ne property.

Sinking is progressing steadily at the Guffey & Galey oil well out of Farming-on, said Superintendent Rumbaugh, who was in from camp during the day. Sharcholders of the Le Reine and Bul-ion-Beck Tunnel companies of Tintic will neet on June 10 to discuss consolidation along the lines already defined.

Work at the Galena in Beaver county has been suspended, said Manager Mor-rls yesterday, although samples indicate the presence of good lead-siver ore in

Maj. Henry Catro of the Ohio Copper company reappeared in the general of-lices again yesterday morning. The May Day has a car of concentrates from its Tintic jigs at the sampler.

Superintendent Alex Colbath of the Alta-Quincy reports the enow about seven feet deep at the mouth of the tunnel.

Mannger Hackett of the Newport & Nevada mines and mill at Fay has arrived with the initial clean-up from the plant. The assessment on Victor Con. of Tin-ic became delinquent yesterday. No tidings have yet arrived at the local iffices of the Annie Laurie to indicate the esult of Tuesday's annual meeting. Another lot of gold-bearing concentrates rom the Century of Park valley is at he sampler.

from the Century of Park valley is at the sampler.

Judge John W. Burton has gone to Ploche, Nev., to inspect recent develop-ments at the Ploché-Nevada Con.

The Lower Mammoth of Tintic reached the market during the day with a lot of ore showing & ounces silver, 3 per cent copper and 70 cents gold per ton.

George A. Hancock has returned after a protracted absence in the East, to again devote his attention to mining interests.
